## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/6/2009 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In regards to claims 7 and 12, it is unclear what element of the system calculates the impulse response (in the third clause of the claims). Further, the "transfer function" and "based on a Fourier transform" limitations of claims 7 and 12 are inferentially included, rendering it unclear whether the claimed system (or what element of the system) calculates a Fourier transform. For the system to calculate an inverse Fourier transform of a transfer function "based on" a Fourier transform of the biosignals, the system must contain an element to calculate a Fourier transform. It is suggested to

specify or set forth the element that calculates these parameters. Lastly, "those signals" of clause "c)" is vague because it is unclear as to which "signals" the limitation refers.

5. In regards to claim 9, the claim appears to be drawn to limiting human body signals, which is ineligible subject matter. It is suggested to recite the claim in terms of functional or structural limitations to the system itself.
6. In regards to claim 10, the limitation "in a manner" is vague because it is unclear whether the claim requires the system to actually apply electrical/drug therapy or if the scope of stimulating "in a manner of" electrical/drug therapy is somehow different.
7. In regards to claim 11, "data" is inferentially included, rendering it unclear whether this element is actually part of the claimed invention.

***Allowable Subject Matter***

8. Claims 7-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
